HS code	10063090		

Rice programs built around your market.

Share your target variety, specification, order volume, packaging preference and destination. Our export desk can review the inquiry and confirm suitable options for a quotation.

Pesticide-Free Rice & Residue Requirements

For buyers seeking pesticide-free rice or strict residue limits, describe the required standard and destination market in your inquiry. Any such claim or supply must be confirmed for the specific lot and supported by suitable, current lot-specific laboratory evidence before it is represented as pesticide-free. Availability, traceability, testing scope and documentation are reviewed per order; this catalog does not certify any listed variety as pesticide-free.

Packaging to discuss

Retail pouches, printed laminated bags, PP woven sacks, non-woven bags and jute bags may be discussed subject to product suitability, destination rules, order quantity and production confirmation.

Order specifications

Confirm variety, processing, grade, broken percentage, moisture, pack size, artwork, quantity and destination requirements in the written quotation and order documents.

Export coordination

Discuss shipment planning and destination details with the export desk. Routes, vessel schedules, documentation and commercial terms are confirmed per shipment.

Quality information

Product specifications in this catalog are indicative. Current lot data, samples, test reports and applicable certifications are shared or confirmed where available for the specific order.

Product specifications, processing finishes, availability, packaging, test documents, certifications and shipment terms are subject to confirmation for the relevant order and destination market. Images are illustrative. This catalog is for general business information and does not constitute a binding offer.
